Art Unit: 3653

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 4-27, 32-41, drawn to a method and apparatus for estimating a length of tape on a reel, classified in class 242, subclass 357.
- II. Claim 30, drawn to a computer-readable medium, classified in class 360, subclass 131.
- III. Claim 31, drawn to electromagnetic signals, classified in class 712, subclass 110.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for estimating tape length on a reel without using computer readable medium. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for estimating tape length on a reel without using electromagnetic signals on a network. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such

as for use in a computer-readable machine without electromagnetic signals on a network. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

It is regretted that the previous restriction requirement was incomplete. The examiner regrets any inconvenience caused to applicant.

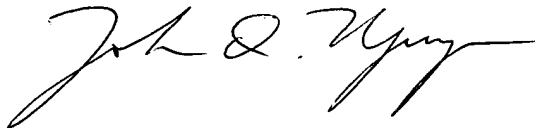

The Terminal Disclaimer filed 1/10/02 has been accepted.
